

Biokenaf

QLK5 CT2002 1729

Final meeting
Athens
Hotel Acropol
26 & 27 February 2007

Efi Alexopoulou
CRES

Objectives of this meeting

The objectives of this meeting are to:

- Review the work done from the beginning of the BIOKENAF project
- Report on the achievements, milestones and deliverables from the beginning of the project
- Discuss about the last deadlines of the BIOKENAF project

Work that was done after the last technical meeting in Madrid

- ⇒ All the partners working on WP2 tried to finish the field trials and to collect and evaluate all the data
- ⇒ Preparation of several articles that will be presented in the next Biomass Conference in Berlin (May 2007)
- ⇒ A lot of work had been done after the meeting in Bologna on the growth model and this meeting is going to focus on presentation of the model.
- ⇒ All the WP leaders tried to fulfill that were responsible for and all this work will be presented today

"Biomass Production Chain and Growth Simulation Model for kenaf"

Contract No: QLK5 CT2002 01729

Funded by European Commission DG RTD

Duration: 1/3/2003- 31/8/2006

In March 2003 a European Network was established entitled "Biomass Production Chain and Growth Simulation Model for Kenaf" aiming at addressing the sustainable yield potential, the alternative industrial bio-products as well as the fuel quality of kenaf as a non-food crop, under certain cultivation techniques, in south Europe

Deliverables

	Deliverables	Deliverable time
D1	Updated timetable	2
D2	Link establishment with AKS	3
D3	Detailed literature review for kenaf	3
D4	Protocols for all field trials	3
D5	First final report and minutes for the project meetings	13
D6	Second final report and minutes for the project meetings	25
D7	Data collection for the growth model	6-36

Deliverables

	Deliverables	Deliverable time
D8	List with the appropriate cultivation techniques	36
D9	Third year report and minutes for the project meetings	37
D10	List of appropriate harvesting dates and methods	12-38
D11	A dynamic growth model and biomass production simulation model	42
D12	Technical specifications of kenaf based products for selected industrial uses	12-40

Deliverables

	Deliverables	Deliverable time
D13	Economic characteristics and market perspectives for the industrial products	12-40
D14	Quality characteristics and energy potential of kenaf as a biofuels for thermo chemical processes	12-40
D15	Environmental impact assessment and LCA	39
D16	Cost analysis	40
D17	Economic comparison of kenaf with other annual crops	40

Deliverables

	Deliverables	Deliverable time
D18	Seminars for the dissemination of the demo fields	36-40
D19	Technical visits for farmers in the 2 ha fields	
D20	Handbook	42
D21	Booklet	40
D22	Papers in European and International conferences and journals	42
D23	Final report	42

Actions to be done in the next two months	Delivery date
Collect all the necessary data from the fields of the fourth year as soon as the final harvest of the fields will be done in order to give them to University of Thessaly for the model validation	15/3/07
The final report has to be sent to CRES as soon as possible	31/3/07
In order CRES to prepare the chapter for adaptability and productivity for the Handbook I need the data from the last year as soon as possible	15/3/07
Final report and cost statement until end of February 2007.	31/1/07
Everything has to be ready (final report and cost statement) two months after the finish of the project	30/4/07
