energy solutions
for better buildings

The European portal for energy efficiency in buildings

- *Find resources*
- *Post your materials*
- *Share knowledge...*

buildup.eu

An initiative of the European Commission

The interactive BUILD UP web portal enables professionals and policy makers in the buildings sector to share knowledge and best practices on building design, construction and operation. The aim is to provide better and more comfortable buildings, with optimal levels of energy efficiency and integrated renewable energies.

High quality content

- Comprehensive coverage of energy efficiency in buildings
- Best practices and case studies
- Extensive technical and legislative resources – both European and national
- Links to financing schemes
- Access to information on training schemes
- Reliable posts subject to approval before publication
- Monthly newsletters: the best of the most relevant articles!

Pan-European coverage

- Targeting EU Members States and more
- Available in 21 official EU languages

Influential platform

- Actively, extensively and regularly used by stakeholders
- Increases awareness by all parties in building chain of untapped savings potential
- Fosters uptake of best practices by the market
- Offers visibility and credibility all over Europe
- Useful and attractive
