

Desalination Units powered by Renewable Energy Systems

Opportunities and Challenges

26 September 2005

Hotel Savana, Hammamet, Tunisia

Organised in the framework of the project ADU-RES
and supported by the EC under the 6th Framework Programme

Participation free of charge - registration required

For registration and more information contact:

Chaibi M.Thameur: +216 - 71 709 033/719 630

Programme of the Seminar

09:30	Introduction	Welcome	Mohamed Nejib Rejeb, INRGREF
09:50		Project ADU-RES	Christian Epp, WIP
10:10	Water supply situation in Tunisia	Water Supply situation in the rural areas of Tunisia	Taoufic Brahem, DGGR
10:30		On-Site situation in Central Tunisia	Abedeljellil Afli, CRDA Kairawan
10:50		Questions and discussion	
11:00		<i>Coffee break</i>	
11:30	Pilot Installations	Description and performance of the pilot plant in Sfax, Tunisia	Aref Maalej, ENIS Sfax
11:50		Using geothermal and solar energy for autonomous water desalination	Karim Bourouni, ENIT Thameur Chaibi, INRGREF
12:10		Spanish Cooperation project in Southern Tunisia: PV-RO desalination unit in the village of Ksar Ghilène	Penelope Ramirez, ITC
12:30		Successful plants worldwide	Eftihia Tzen, CRES
12:50		Questions and discussion	
13:00		<i>Lunch break</i>	
14:00	Research and Development	Improvements in energy efficiency	Murray Thomson, Loughborough University
14:20		Development of an autonomous solar rankine cycle system for RO desalination	Dimitris Manolakos, AUA
14:40		Solar desalination for water supply in Southern Tunisia	Hammami Naceur, ANME
15:00		Questions and discussion	
15:10		<i>Coffee break</i>	
15:30	Market available technologies	Solar thermal desalination for rural applications	Stefan Thiesen, ZONNEWATER
15:50		The Solco PV-RO system	Duncan Stone, SOLCO
16:10		The ENERCON Wind - RO System	Frank Hensel, ENERCON
16:30		Questions and discussion	
16:40	Closing session	Conclusions and next steps	Panel Discussion
17:00		End	

Organised jointly by:
