

Solar thermal heating and cooling

Markets and Policies today

Prague, 26 February 2009

Uwe Trenkner - ESTIF Secretary General

European
Solar
Thermal
Industry
Federation

Introducing ESTIF

- European Solar Thermal Industry Federation
- Representing the solar heating and cooling sector at EU level
- 105 members, representing >95% of the market
- A founding member of EREC
- Based in the Renewable Energy House, Brussels

European
Solar
Thermal
Industry
Federation

Thanks!!!

This conference is supported by the European Commission under their Intelligent Energy-Europe Programme

Intelligent Energy  **Europe**

Transfer of experience for the development of Solar thermal products

Federation

EU Renewables Directive

- Agreed by European Parliament and Council in December 2008
- Formal adoption in February/March 2009
- Transposition into national law within 18 months

Main concepts of the RES-Directive

- 20% EU RES-target by 2020
- Mandatory national targets
(CZ: 6.1% in 2005 -> 13% in 2020)
- National Renewable Energy Action Plans:
 - national targets for the shares of energy from renewable sources in transport, electricity and heating and cooling in 2020
 - adequate measures to be taken to achieve these national overall targets

Major boost for solar thermal

- Renewable heating/cooling at the same level as RES in electricity and transportation
- RES obligation in new and existing buildings by 2015
- Exemplary role of public buildings
- Qualification of installers
- European standards and certification

European
Solar
Thermal
Industry
Federation

Next steps – NATIONAL IMPLEMENTATION

- National Renewable Energy Action Plans
 - high target for RES heating/cooling
 - best possible RES obligation
 - qualification/certification of installers
 - information to professionals
 - reduction of administrative barriers
 - exemplary role of public buildings
